HD Video Conferencing Made Simple

Crestron Smart Space™

Smart Space is the new multi-person, multi-display solution that delivers advanced enterprise-wide communication and HD video conferencing.

Smart Space is a complete open architecture solution. It's engineered to provide simple setup and operation, so you can spend your time more productively, instead of trying to get everything to work. The Smart Space package includes everything you need.

Developed by Crestron for use with Cisco® conferencing and infrastructure, Smart Space enables you to easily take control of meetings with its standardized, intuitive user interface.

A repeatable, flexible, and scalable solution, Smart Space is simple to integrate, manage, and maintain. The code is already written, so no programming is required, saving you time and money.

Easy to Deploy and Manage

- Engineered for easy integration, management, and maintenance
- Crestron provides the Smart Space pre-engineered program and quick start installation guide to authorized dealers, all at no charge
- Crestron authorized dealers load the program, use the built-in setup pages to instantly configure the system, and the customer receives a fully configured and streamlined system that is easy to use
- Takes the guesswork out of specifying and delivering HD video conferencing systems
- Enables technology managers to maximize investment in AV and communication technologies for conference rooms, training rooms, and other meeting facilities
- Scalable to your entire enterprise – deploy to one room or many, with consistent performance and ease of use in every room
- Scalable to allow remote management, maintenance, and concierge services

Easy to Use

- Total control through simple touch screen commands and the intuitive Crestron for iPad® app
- Quickly launch meetings, HD video conference calls, audio calls, and presentations with a single press
- Delivers high-quality audio, HD video, and crisp computer graphics locally or to remote locations
- Control room lighting and motorized shades with built-in Crestron integration
- Launches and starts Cisco Jabber® and WebEx® from the optional dedicated PC
- Book rooms on the fly from the optional Crestron scheduling touch screen located outside the door
- Supports Crestron Fusion RV® software for room scheduling

Easy to Order

1. Visit Crestron.com/smartspace to select one or two displays and the necessary equipment from the Smart Space Equipment List
2. Order items from each manufacturer through their normal sales channels
3. Download the Smart Space program
