## TRIPLECHOICE USER PORTALS

The management of video within any organisation is becoming as important as managing voice and data. The TripleChoice portfolio of user portals provides a complete platform that meets those media requirements.

The ability to customise and personalise what your end user sees when logged into a Video on Demand or IPTV solution is vital if you're trying to present a quality, strong brand image. TripleChoice allows just that with the use of several pre-defined layouts and screen navigation systems coupled with the ability to amend and edit images, logos and colours.

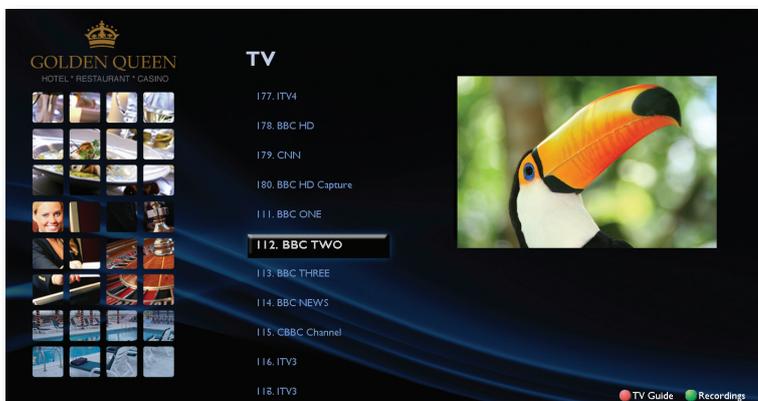

With pre-built portals for Education, Media, Stadia, Hospitality and Corporate use there is a full range to choose from and edit to suit any need. By allowing you to integrate multiple mixed media services into one portal, TripleChoice simplifies content delivery in a sophisticated and user friendly way.

TripleChoice however isn't just used for viewing TV and video content, it provides a set of processes and tools to allow users to easily manage and interact with all their video media content.

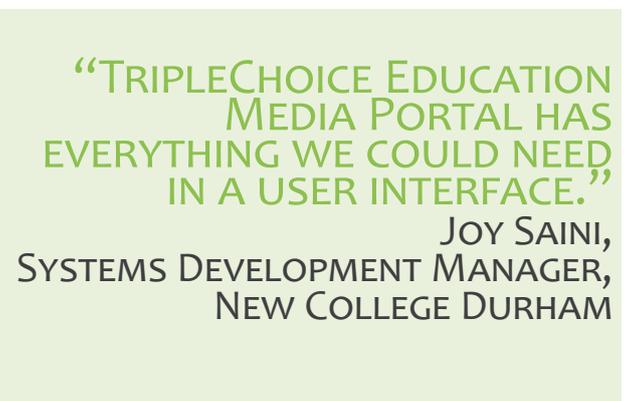

Including the ability to control live TV with Pause, Rewind, Fast Forward and Record features, arrange and categorise content, bookmark and add comment to video clips, TripleChoice empowers your users through a feature rich and intuitive user interface.

# TRIPLECHOICE USER PORTALS

For the hospitality industry there is the ability to include hotel services into a package, allowing guests to book restaurant tables, check out of their room, order room service or book a wakeup call. Whilst, for educational establishments there is the ability to bookmark and comment, allowing homework to be media based whilst also creating discussion forums around that content.

Available in Generic, Standard and Premium editions, TripleChoice is a truly user friendly solution, taking the pain away from your staff and gives your users a world class experience.

Package includes;

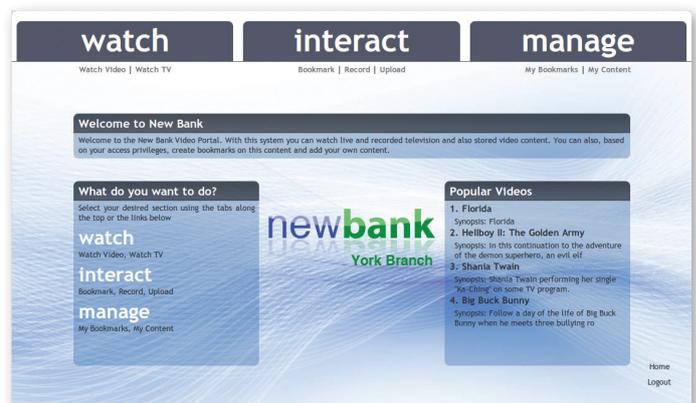

- 👁️ Boutique Hotel Portal
- 👁️ Corporate Portal
- 👁️ Education Media Portal
- 👁️ Hotel Portal
- 👁️ Stadium Portal
