# VidyoSlate™

View, share, and annotate content

With VidyoSlate, your tablet becomes the ideal second screen in a Vidyo conference, putting content collaboration at your fingertips. VidyoSlate lets you share documents directly from your tablet into the conference, view and annotate the content shared by any conference participant, and share whiteboards so that everyone can view your notes and drawings.

Like all Vidyo endpoints, VidyoSlate takes advantage of the H.264 SVC standard and Vidyo's exclusive dynamic adaption technology to deliver exceptional performance, resolution, and reliability over broadband wireless networks. VidyoSlate supplements the VidyoMobile™ and VidyoDesktop™ applications, and the VidyoRoom™ and VidyoPanorama™ multi-screen room systems, and is designed to receive and transmit shared content (not audio or video streams). The VidyoSlate app is available as a free download.

## Key Features

### General Features

- Tap-to-connect to a Vidyo conference
- Pinch-to-zoom to reveal fine details and make small text easily readable
- Swipe-to-pan across high-resolution content and spreadsheets
- Multitask in other applications while VidyoSlate remains connected to the conference

### View Shared Content

- Switch between content shares from any participant
- Personal view: zoom in and pan across to see what matters most to you
- Second screen: view one content share on your VidyoRoom or VidyoDesktop screen, and another on your tablet

### Create Notes and Annotations

- Mark up shared content with pen and highlighter tools
- Sketch at up to 3 megapixels of resolution
- Save annotations to your tablet

### Share Documents

- Share documents (DOC, DOCX, PDF), presentations (PPS, PPT, PPTX), and spreadsheets (XLS, XLSX)
- Access and share email attachments, browser downloads, and files in cloud storage (such as Dropbox and Box)
- Annotate documents as you share them into the conference

### Share Whiteboards

- Share whiteboards from your tablet into the conference
- Create and save multiple whiteboards for virtually unlimited room to draw
- Distribute saved whiteboards by email

# Specifications

## VidyoSlate™

### Share Documents

Shared file locations	Email attachments, file storage apps, and cloud-based storage services
Supported file types	Documents (DOC, DOCX, PDF), presentations (PPS, PPT, PPTX), and spreadsheets (XLS, XLSX)
